

Mantis S2400 Portable Speakerphone for Mobile Phones

The Mantis S2400 was designed with the true multi-tasker in mind. This portable, bluetooth speakerphone lets you communicate with clarity in the places where you talk the most. When you're driving in your car or working hard in the office, the S2400 gives you the freedom to talk while remaining focused on the task at hand. Unlike most speakerphones that echo or sound muffled, the S2400 is armed with "CVC- Clear Voice Capture," which delivers sound that's so crystal-clear, you'd swear you were talking face to face. Compatible with virtually all cell phones, the S2400 will help you make the most of your valuable time. And with up to 10 hours of talk time and 28 days of standby time, you won't have to worry about a dead battery cutting your conversation short. Experience a new way of mobile communication, where superior sound comes standard.
