EPMG's History

History of the Group

EPMG, founded in 1973, is supported by physician leaders and an executive team with extensive experience and proven skills in organizational management and program development.

Since 1973, the group has enjoyed an impressive record of long-term relationships with its client hospitals. Following a controlled growth strategy, EPMG has become one of the largest providers of emergency medicine staffing, management, and consulting services in the United States. It is affiliated with two other emergency medicine medical groups: Emergency Physicians' Medical Group Northwest (EPMG-NW) and Sutter Emergency Medical Associates (SEMA). The group, with its affiliate medical groups, currently staffs and/or manages 30 EDs in California, Nevada, Washington, and Hawaii providing emergency and urgent care services to over 900,000 patients annually. Fifteen contracts have been in existence for over five years, and eight for over ten years. Several contracts date back more than twenty five years, a reflection of the group's stability and ongoing contribution to its hospitals.

Contracts include twelve teaching hospitals, three trauma centers and affiliations with five emergency medicine residency programs.

The EPMG Difference

**Democratic governance.
Equitable oversight.**

Each physician has an equal voice. The elected EPMG Board of Directors has oversight over day-to-day operations. Each physician can expect the same scheduling parameters, distribution of shifts, and salary and benefits as his/her partners.

Every EPMG physician is encouraged to take an active role.

EPMG prides itself on its "open door" and "open book" approach when it comes to accessing physician leadership and information. Career growth is based on merit rather than seniority.

EPMG recognizes that professional and personal needs change during the course of your career.

There are excellent opportunities for every professional and personal lifestyle through a wide spectrum of geographic practice locations, high and low intensity clinical settings, and clinical and administrative leadership positions.
