This kit displays your mobile phone's information on an LCD screen along with incoming calls, number dialed and the last number called. The screen/ keypad can be installed anywhere on the dashboard and provides the optimal viewing angle for comfort and readability. Compatible with the majority of bluetooth phones.

The car's speakers reproduce the caller's voice. The microphone captures the sound of your voice while it filters out background noise. When someone calls, the car radio automatically cuts out to allow for a quiet conversation.
