

**BET YA DIDN'T KNOW... SAFEGUARD HAS COMBINED ITS SUPERIOR ANTI-SLIP WITH GLOW-IN-THE-DARK TECHNOLOGY**

# **INTRODUCING THE SAFEGUARD HI-TRACTION GLO SERIES IN FIVE NEW COLORS**

Our Hi-Traction Glo covers are ideal for illuminating the leading edge of steps and aisle-ways in the dark. The integrated glow pigment in the surface of the cover lasts for the life of the product and can produce a glow for 16 hours when charged by direct light. The Hi-Traction Glo line is available with custom HiGlo safety messages that use a photoluminescent background, illuminating the message in the dark and providing a safe egress during emergency evacuations.

Photoluminescent glow shown above
