

WINEGARD®

TR-3500 Tripod Mount with Carry Bag — Designed for Multi-Satellite Antennas

TR-3500

New TR-3500 Tripod Mount from Winegard Features Easy Setup and Portability

TR-3500 accommodates **multi-satellite** (DISH Network® DISH 500 or DIRECTV® Oval Dish), or 46 cm (18") satellite antennas. Designed to be used in almost any area, the legs can be quickly adjusted for uneven surfaces. Set up tripod, level with included bubble level, and use ground anchors if needed. Put antenna on the mount pipe, then use the compass, also included, and quickly find the satellite. (Of course, you must have a clear view of the Southwest sky, and clear of trees, tall buildings or other signal obstructions.)

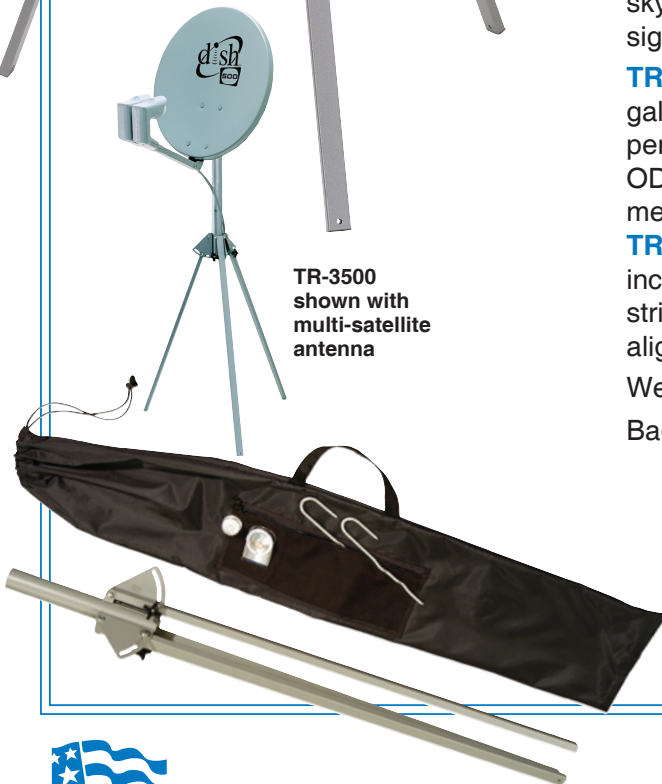

TR-3500 is manufactured from sturdy galvanized steel that is E-coated for superior weather durability, and has a 1.66" OD mount pipe. Mount and pipe together measure 45-1/4" when folded for storage.

TR-3500 comes completely assembled and includes convenient heavy black nylon draw-string carry bag, ground anchors, satellite alignment compass and bubble level.

Weight: 12 lbs. UPS shippable.

Bag measures 9-3/4" x 49".
